ROCTEST WINS A MAJOR CONTRACT WITH HYDRO-QUÉBEC

St-Lambert, Qc, October 26 2005 – Roctest Ltd. “Roctest” (TSX : RTT) has recently been awarded an important order from Hydro-Quebec for the Peribonka river project, located some 160 km Northeast of Lac Saint-Jean in the Province of Quebec, Canada. The CND \$ 840 000 contract, which will be delivered in 2005, includes instrumenting the dam as well as on-site training.

Most of the instrumentation equipment such as piezometers, pressure cells, TDR cables (Time Domain Reflectometry) and data acquisition systems will be used during the construction of the dam which will take place over the next three years. Once completed, the dam will be 80 meters high, 700 meters wide and will feature two enclosing dams.

“Our equipment is used to reduce the risks of accidents by detecting anomalies on the dam, during the maintenance and monitoring programs of the structure while in construction and during the operating phase. » - said François Cordeau, President and Chief Executive Officer of Roctest.

About Roctest

Roctest designs, manufactures and markets sensors and high-precision measuring instruments for challenging applications in the civil engineering, energy, healthcare and defence markets. Its products are mainly sold internationally. The Company has over 140 employees in Quebec and France, and its shares are listed on the Toronto Stock Exchange under the symbol RTT.
